Window cleaners brought down to earth by Reach & Wash

The sight of window cleaners up ladders brandishing bucket and squeegee could soon be a thing of the past thanks to The Reach & Wash System.

Hygiene's Reach and Wash team

Hygiene Group, one of the UK's leading providers of hygiene management services to the food sector, believes this ladder-less method is the answer to the risks associated with traditional window cleaning.

It is environmentally friendly, too, and can be used to reach low-level, difficult-to-access windows.

-more-

The Reach & Wash System has five advantages:

- Health and safety – eliminates working at height risk
- Cost – no access equipment hire, quicker therefore cheaper
- Less damage – cuts ladder-damage to sills, gutters and slates
- Quality – most effective window cleaning available, eliminating squeegee marks and lines
- Frames and sills – cleaned thoroughly as well as windows

Hygiene Group managing director Steve Bailey said: “Reach & Wash pushes dirt away aggressively using almost 100% pure water, leaving glass, window frames, cladding and signs clean without the need for chemicals and detergents.

“And it signals the beginning of the end for old-school window cleaners who rely on dangerous ladders and expensive hydraulic platforms.”

-ends-

Note to Editors

Hygiene has grown from modest beginnings more than 20 years ago to become the largest and leading supplier of hygiene management in the UK. It can be visited at www.hygiene.co.uk
